PRAVEEN THANTRY
Director-Sales

"..Ever since the transformation from incandescent lighting to LED technology, it is a lot more beyond just illuminating a space, when we talk about lighting in a retail store . The art and science of lighting retail spaces has evolved so much over the years, and so also the overall value proposition that surrounds a lighting project. We have understood the importance of various key aspects that go along with every lighting plan - starting from involvement at the concept stage, creating immaculate application design - to finally handing over the project, and taking care of warranty obligations - we go all the way in giving comprehensive and total support to the clients - something that our customers distinctively identify us with.

*Called '**The Gardler Advantage**', this spectacular package of supports, which is unique and most powerful in the lighting industry - takes every aspect a client would wish to be offered.. Simply said, it provides an unmatched, extraordinary experience to our clients.*

Read on.. you will understand what we say..."

**Blending technology
with our imagination, we create magic.**

Gardler Lighting...

- Cutting Edge Technology
- Unique Client Interface
- Seamless Supports
- Contemporary Range of Products
- Great Value-add Services

When the subject is about illuminating a retail space, there is simply no match to the value proposition that Gardler offers to the clients. Their solutions are not just limited to supplying a product or providing a service that only lights up a store – but goes much beyond in delivering a comprehensive package that meets every single aspect – right from the project concept stage to the completion of the store, and well.. until the end of life cycle of the products we offer. Indeed an experience, the client would find as the most delightful ever from a supplier.

The unique 5-dimensional advantage from Gardler carefully integrates all critical supports – most of which often go as unexpressed by the clients – in every phase , from project planning, design, manufacturing, pre and post supply, installation, commissioning to warranty tenure, and subsequent stages.

Read on.. and discover a different experience with Gardler..

**Cutting Edge
Technology**

Gardler is committed to offering the latest in technology available across the globe – not only in core lighting but in other associated fields as well that help create an integrated illumination management and control solutions, for retail environment. With rapid advancements in LED COB and Driver technologies, there are many interesting combinations with other app-based or cloud-based interfaces that virtually opens up hitherto-not-seen scenarios.

Over the years, Gardler has taken the lead in the industry by bringing in many technologies and applications, changing the way in which illumination was being looked at, in a retail store.

We share with you some of our offerings in the recent times.

Connected Technologies

Human Centric Lighting

Human Centric Lighting is all about supporting human health, well-being and performance through effective alignment of lighting patterns with circadian rhythm of humans. Gardler has a thorough understanding and requisite know-how besides relevant technology partnerships for providing a comprehensive solution on this highly looked up subject.

Tuneable White

The concept allows presentation of products under different colour of light, to create maximum visual appeal, and setting the ambience to make the right impact on the customers. This is possible by interfacing the fixtures with an app (controllable through mobile) and connecting it over blue tooth. Gardler has pioneered this concept and technology for retail application in the country.

GARDLER®

Trial Room Lighting System

This interactive lighting system by Gardler combines occupancy / motion sensors along with the lighting fixture for a 3-stage colour changeability for creating varied ambience, enabling the customer to view his/her garments under different light colour temperatures.

Infra-red movement sensor that switches on the lights when a customer moves in, auto-dimming that reduces the light when the room is not occupied. In all, a fabulous experience to the customers.!

Let the mirror
show a new you..

With SpectraWhite
white is amazingly white and
colors are astonishingly vivid.

SpectraWhite luminaires integrate COB-LED specifically created for special applications where the lighting brings alive the wide colour spectrum and shows the merchandise in their most natural colours and vibrancy.

The new Spectrawhite range of LED lighting from Gardler elevates the product allure to the ultimate level and evokes the desire to shop. A combination of top-notch lighting quality, excellent light distribution and extraordinary efficacy is what makes Gardler SpectraWhite luminaires deliver a never-seen-before illumination and results.

Magnetic Track

The versatility of this contemporary system allows you a remarkable level of flexibility, convenience, elegance and ease of installation /modification. With the adaptability of different types of fixtures - linear diffused, track spots wall washer and flood lights - this modular construction of power track lets you change the angle and beam of the light in the way you want - and where you need, giving the entire show window, not only a mesmerizing glow, but also a great deal of flexibility and display pattern and layout.

3d Ultra High Efficiency Reflector

Reflectors in luminaires are important for effective and controlled distribution of light beams to get the right coverage of space and a comfortable viewing of the area and things around. Gardler has developed the most innovative 3D facet reflectors that create stunning visual appeals in the retail store.

Lighting is the lifeline
of a retail store..

Presenting India's
First
CRM PORTAL

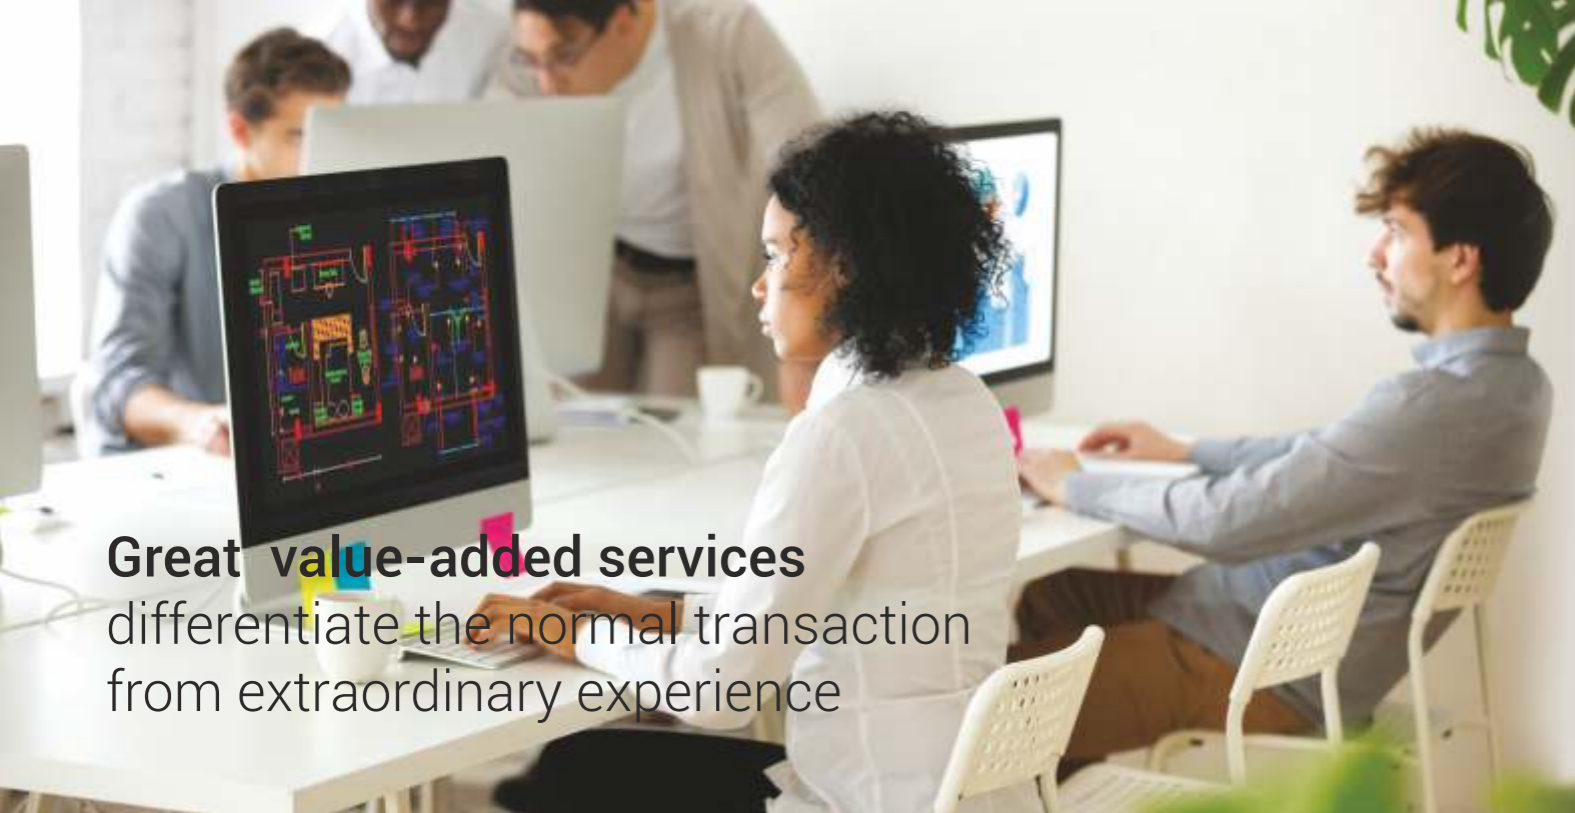

in lighting industry, that defines a new customer experience,

Unique Client Interface

Designed to create a never-before-seen client interface in lighting industry, for redressal of service needs, if and when needed, GARDLER's CRM Portal combines Speed, Efficiency and utmost ease of operation.. Breaking the conventional and laborious method of registering service complaints by the clients over phone or mails, Gardler's CRM portal brings the entire process & communication at the click of a screen. At each stage of the process, the structure not only offers real - time updates, but also provides alert messages by sms. The underlying principle of this module is creating a delightful experience for our clients.

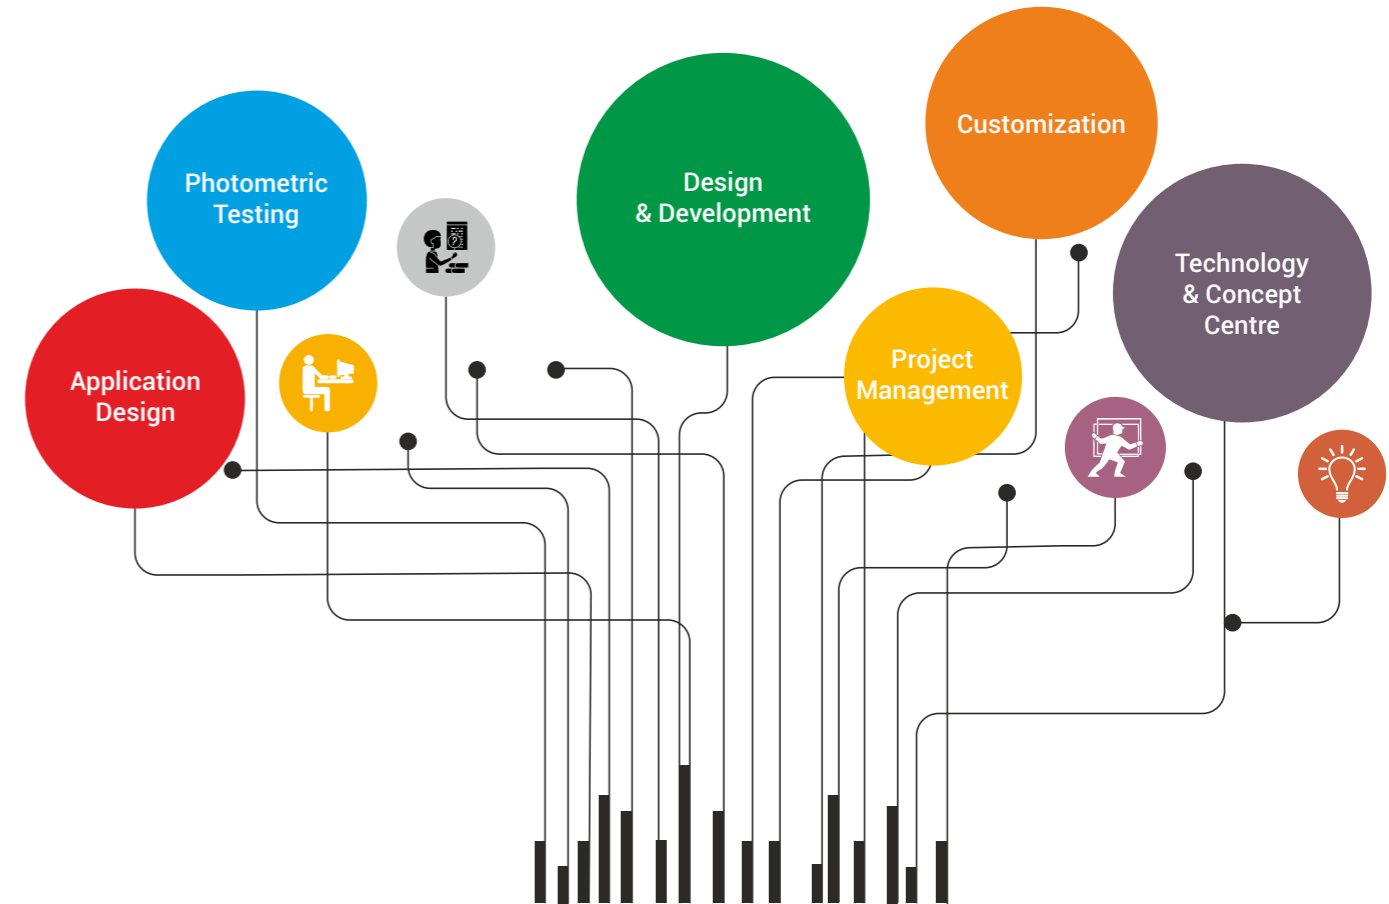

Great value-added services differentiate the normal transaction from extraordinary experience

Great Value-add Services

Often, the difference between a normal transaction and a delightful experience for a client, lies in how much of value-added services / supports the brand / seller extends. Gardler, through their extraordinary list of value additions right from concept stage to completion, makes the entire experience unparalleled. Be it application design offering optimal lighting solutions, or Testing and Development facility, to customising specific fixtures - Gardler is a one-stop window for every need and applications.

...a palette of services that leaves out nothing.

Seamless Supports from Gardler enhance the delightful experience further

Seamless Supports

Taking customer experience several notches higher, beyond great products, superior value-added services, Gardler has seamlessly integrated certain supports that all combined together form an exceptionally strong value proposition to their clients.

Such a phenomenal package in the lighting industry is an exclusive deal from Gardler.

Retro-Sol

..a comprehensive solutions package for retro-fitting conventional lighting to LED

Gardler Lighting has created a unique value proposition Retro-Sol, for their clients, through which an extensive inspection / survey of the existing conventional lighting system in a store is carried out, and a scientific, structured assessment of the lighting is made.

And then, a very care-fully prepared lighting design with LED is furnished with focus not just on energy savings alone, but presenting the store in a whole new ravishing light. Retro-Sol goes further.. In case financing / leasing options are sought by the clients, Gardler Lighting does

referral to one of India's most respected companies that extends such facilities. This arrangement is subject to certain parameters / criteria as prescribed by the finance company.
